### DETAILED ACTION

Applicant's arguments filed 08/27/2003 have been fully considered but they are not persuasive. The response submitted by Applicant does not overcome the rejection made by Examiner in the last Office action.

Claims 7-10 and 15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over jp2000345431=Chem Abstract 134: 18440.

The rejection is maintained for the reasons as stated in the last Office action and for the following reasons:

Applicant's arguments are based on the claimed characteristic in that the polyketone solution has a phase separation temperature in the range of 0-150 C.

The reference does disclose a polyketone solution obtained by mixing 0.005-70% polyketone, (which is read on this of claim 15: 1-40%) comprising an alternating copolymer of carbon monoxide with ethylene (the claimed structure would be considered inherent in the prior art) with at least one kind of zinc halide aqueous solution or an aqueous solution containing at least one kind of metal salt other than zinc halide, ---, and the Pd content is less than 100 ppm, or 37 ppm (see Abstract), as required in claims 7

The following position is taken because the instant claims are read as broadly as possible. Limitations from the specification or Remarks as to how the polyketone solution is produced are not read into the claims. The claims as presented are included

within the broad teachings of the reference since they read on a polyketone solution produced from any methods having the claimed characteristic.

Applicant's arguments are based on the use of a phase separation spinning to have the claimed phase separation temperature. Said arguments have been fully considered but they are not persuasive since they are not commensurate in scope with the claims.

Note that this is the claimed composition and since the reference does disclose the required reactants, the Pd content, then the claimed characteristic such as phase separation temperature must be considered inherent in the prior art.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Claims 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
